SUMMARY

SENIOR SOLUTIONS ARCHITECT | AI INFRASTRUCTURE | NETWORKING | HYBRID CLOUD

Infrastructure architect and technical leader with 20+ years of experience designing large-scale data center, networking, hybrid cloud, and infrastructure automation solutions across SaaS, healthcare, and financial services environments.

Deep expertise in spine-leaf architectures, EVPN/VXLAN, SDN, Kubernetes, AWS, automation frameworks, and multi-tenant infrastructure. Experienced in translating business and operational requirements into scalable infrastructure designs while collaborating with engineering, product, operations, and executive stakeholders.

Recently focused on AI infrastructure networking, multi-tenant GPU factory architectures, Ethernet fabrics, orchestration workflows, and infrastructure abstraction for AI cloud environments.

TECHNICAL EXPERTISE

AI Infrastructure | GPU Factory Networking | Spine-Leaf Fabrics | EVPN/VXLAN | BGP | OSPF | MPLS | ECMP | SD-WAN | Kubernetes | AWS | AWS Outposts | EKS | Hybrid Cloud | Infrastructure Automation | Terraform | Ansible | Puppet | Jenkins | VMware NSX-T | Linux | Whitebox Switching | Arista | Cisco | Juniper | Cumulus Linux | Multi-Tenant Infrastructure | Infrastructure Documentation | Technical Strategy | Cross-Functional Leadership

EXPERIENCE

Netris inc

(June 2025 – current)

Product Manager

- Drive product direction and technical workflows for AI infrastructure networking and multi-tenant data center orchestration platforms.
- Collaborate with engineering and architecture teams on Ethernet fabric automation, EVPN/VXLAN networking, server onboarding, tenant isolation, and AI factory infrastructure workflows.
- Author detailed technical documentation, deployment guides, infrastructure reference architectures, and customer-facing solution materials for AI infrastructure operators and NVIDIA ecosystem deployments.
- Work with technologies and architectures related to GPU infrastructure, DPUs, Kubernetes, cloud-native networking, and large-scale multi-tenant data center fabrics.
- Translate customer operational requirements into infrastructure workflows, user stories, topology models, and deployment guidance.

athenahealth inc.

(May 2015 – Oct 2024)

Director of Infrastructure and Network Architecture

- Designed and led deployment of scalable hybrid cloud infrastructure connecting AWS public cloud, AWS Outposts, Kubernetes environments, and legacy on-premises infrastructure.
- Built AWS EKS container platforms and automated CI/CD infrastructure pipelines using Terraform, Jenkins, and Ansible.
- Re-architected data center networking into spine-leaf fabrics using whitebox switching, reducing per-port cost by 75% while increasing forwarding capacity by 4x.

- Implemented EVPN-based overlay networking and SDN architectures using VMware NSX-T and infrastructure automation frameworks.
- Led infrastructure modernization initiatives involving security zoning, ECMP routing, automation, compliance, resiliency, and operational scalability.
- Reduced firewall dependency and improved scalability by redesigning network segmentation and transitive routing architectures.
- Directed cross-functional infrastructure projects spanning networking, cloud, security, operations, and engineering teams.
- Established architecture review forums and documentation standards to improve operational maturity and technical alignment.
- Mentored infrastructure and network engineers while serving as senior technical advisor for infrastructure strategy and risk assessment.

Santander Bank, N.A.

(March 2011 – April 2015)

Network Team Lead and Architect

- Designed and operated large-scale multi-entity enterprise infrastructure supporting 750+ branches and 1000+ ATMs.
- Built MPLS, VRF, MP-BGP, and DMVPN-based enterprise networking environments with strong focus on resiliency and scalability.
- Led technical designs for WAN modernization, routing architecture, remote connectivity, wireless networking, and firewall infrastructure.
- Implemented enterprise authentication and access control systems including 802.1x, TACACS+, and RADIUS.
- Managed complex firewall environments including Cisco ASA and CheckPoint VSX clusters.
- Mentored junior engineers and coordinated operational standards, deployment workflows, and incident response improvements.

Massachusetts College of Pharmacy

(December 2009 – March 2011)

Senior Network Engineer

- Designed and maintained multi-campus WAN/LAN infrastructure across 11 buildings and 3 cities.
- Implemented QoS, wireless networking, firewall architectures, monitoring systems, and redundancy frameworks.
- Developed operational standards, documentation, and infrastructure procedures supporting long-term scalability and reliability.

EDUCATION and CERTIFICATIONS

B.S. in IT, Computer Networking and Security, Herzing University

CCNP - Cisco Certified Network Professional

AWS - Certified Solutions Architect - Associate

AWS - Certified Advanced Networking - Specialty

AWS - Certified Developer - Associate

CCONP - Cumulus Certified Open Networks Professional

ITIL Foundations
